About

Experienced React developer, proficient in creating innovative Front-End Applications across various domains. Expertise in developing CSR and SSR web applications, seeking opportunities to leverage my skills in challenging projects.

Open to learning and expanding my skill set. Let's connect! Always eager to learn and grow, I am open to expanding my skill set to meet the needs of future projects

Ready for challenges and motivated. Comprehensive knowledge of application design structures and build Fast Complicated Ui's

Experience

I have trained and certificated in a programming bootcamp called MapsaHr
There I learned collaboration and teamwork with React and Next frameworks

And I also have 2 years of experience working in a team at Notash Company an Iot platform. I did work with Complicated data intensive application Web Socket, redux and CSR

When you work with small teams of front and backend developers you are forced to struggle with too many challenges in software design, I also worked as a frontend developer in nextjs heavy project called Kafineteman.

```
Mapsa Hr Bootcamp    1400 – 01  1400 - 06    Certificated
Notash Company IoT   1400 - 08  1402 - 05    IoT Platform
Kafineteman          1402 - 07  1403 – 03    Remote Job
```

Education: I did not continue university
Unofficial employment request due to military service
